It's possible to eat very well today in virtually every corner of America. It could be homemade waffles or classic burgers at a popular diner, vivid foods from other cultures (such as Thai or Colombian or Moroccan), or refined Michelin-starred dining in some temple of gastronomy — or anything in-between.

In every state, however, there's inevitably at least one establishment that has attained iconic status, a place emblematic of its surroundings — a restaurant no food-lover should miss when in the vicinity.

Sometimes these places are plain, sometimes they're fancy. They might be relative newcomers to the dining scene or have been around for a century or more. What matters is that, in one way or another, they represent and define their time and place — sometimes simply by perfecting some unique local specialty.

45. Vermont

Restaurant: Wayside Restaurant, Bakery & Creamery

Location: Montpelier

“Yankee cooking at its best since 1918,” brags this traditional American restaurant, bakeshop, and ice cream parlor. Fried clam strips, ham steak, and (for the adventurous) pickled honeycomb beef tripe, are typical entrées. Desserts include homemade pies, Grapenut custard pudding, and of course Wayside ice cream.
